

**The Tulalip Tribes and City of Everett
Joint Board for Managing the
Construction of the Everett to Tulalip Waterline**

NOTICE: PUBLIC INFORMATION MEETING

MEETING TOPIC: Everett-Tulalip Water Pipeline
MEETING DATE and TIME: Wednesday, June 2, 2010
5 PM to 8PM
MEETING LOCATION: Tulalip Hotel and Resort
(See Lobby Display for Room)

The Tulalip Tribes and the City of Everett are jointly installing a new water transmission pipeline to provide improved water service to the Tulalip Indian Reservation and Smith Island in the City of Everett.

This pipeline is largely located within public streets, but in some cases will need easements across private property.

The Joint Water Pipeline Board, comprised of the Tribes and the City is holding this public information meeting to explain the project to property owners and other interested persons on the Tulalip Reservation.

The pipeline route is shown on the attached map. It generally follows this route:

- The pipeline starts at the existing water line at Railway Ave. and Harrison Street, follows Harrison Street and Grand Avenue East to just north of I-5, and is located within the BNSF Delta Railway Yard to just east of SR 529 (2014 construction).
- It crosses the Snohomish River just east of SR 529 and 35th Ave NE through Horizontal Directional Drilling under the stream bed (2011 construction).
- It crosses under the SR 529 Bridge and continues north along the alignment of 34th Avenue NE largely within city or state road right-of way (2012 construction).
- It crosses Union, Steamboat and Ebey Slough through Horizontal Directional Drilling under the river bed. (2011 construction)
- On the Tulalip Reservation it follows 60th Place and 31st Avenue NE to south of marine Drive (summer, 2010 construction)
- It continues north of Marine Drive where it turns west and crosses Quilceda Creek through Horizontal Directional Drilling under the stream bed (2011 construction).
- It continues north on 27th Avenue NE to 88th Street NE (Construction started).

Joint Water Pipeline Board and Tribes staff and the project engineers will be available at this meeting to go over project plans and answer questions.

If you have questions about the meeting, please call Clair Olivers, the Joint Water Pipeline Board's Project Administrator, at 425-212-8816.
